

MenuPlus

Menus are at the heart of your E1 implementation. Efficient design can enhance user experience while reducing training needs. Complex menu structures are difficult to navigate and change.

MenuPlus offers super efficient menu management in a grid, enabling you to update and design security offline. Utilize it for upgrades or for simplifying menu maintenance and security.

Have you ever asked yourself... The benefits

- Why are there so many items on my menus?
 - Is menu access a security risk?
 - How does security information align with business processes?
 - How do I simplify security and menu management?
 - Can I leverage my menus to reduce fraud risk?
 - Is it easy to translate menus?
- ✔ Save 100s of hours with synchronized roles, menus and security
 - ✔ Easily design offline and copy/paste straight into JDE
 - ✔ Set up menus in a fraction of the time
 - ✔ Efficiently mass update and change menus and security
 - ✔ See what's visible to users with enhanced reporting
 - ✔ Turn your security data in to actionable information
 - ✔ Visibility of back-door risks that enable unwanted access

Product details

Features	Standard JDE	MenuPlus
Maintain E1 versions in a grid	✘	✔
Turbocharged menu filtering	✘	✔
