

# ProfilePlus

Set-up and maintenance of roles, user profiles, and licensing can take up a lot of resources. How can you accelerate the process?

ProfilePlus includes easy-to-use tools that support setting-up users at the click of a button, streamlined role allocation, and automated clean-up. In addition, get visibility to why role assignments may have changed and captured approvals among other things.

## Have you ever asked yourself... The benefits

- Does setting up a user have to be difficult and time-consuming?  Increase efficiency with a one-stop-shop for user provisioning
- Can I expedite the user and role provisioning process?  Easily create roles offline and copy/paste straight into JDE
- Is it possible to shift user set-up processes away from IT?  Simply enable approval controls for role assignments
- Is there an easier way to perform role allocation reviews?  Instant clean-up and rationalization of users, roles, and security
- Can I enforce an audit trail for role assignments?  Enhanced visibility of users to roles via simple reporting
- How can I record role assignment approvals for audits?  Automatically upgrade data from older JDE versions (XE)
- Can information that highlights irregularities in my user set-up be more easily available?  Quick visibility to Oracle user license compliance

## Product details
