Transparent Logon

Single Sign-on has never been easier!

Secure your people for logging into JD Edwards by using Steltix Transparent Logon X10.

What is Transparent Logon?

Steltix Transparent Logon uses a cross-reference database that correlates Active Directory users with one or more JD Edwards EnterpriseOne users.

Steltix Transparent Logon is cost effective and installed within the hour and does not require any software changes to either JD Edwards EnterpriseOne, Active Directory or any other hardware or software component.

steltix

New TLX10 Features

- Multi-factor authentication prevents unauthorised access to sensitive data and transactions

- Instant login to your system without additional validation.

- Quick return on investment due to a decreased help desk capacity and increased productivity.

- Enhances the user experience by eliminating the need for multiple logins and providing a seamless authentication process

- In-app audit trail for usage and administrative actions to help your company stay compliant.
